SALOMON BIZIMANA

IT consultant/Data Analyst

Experienced IT consultant with a strong background in web development, software engineering, and networking, specializing in the use of Django and Python. Proficient in building and deploying robust web applications using Django framework and Python programming language. Skilled in designing and implementing secure and scalable networks, troubleshooting network issues, and ensuring network availability and reliability. Deep understanding of web development principles, software development life cycle (SDLC), and agile methodologies. Proven ability to analyze complex business problems, design effective solutions, and implement IT strategies that improve organizational productivity and profitability. Successful track record of leading cross-functional teams, managing projects from conception to delivery, and building long-lasting relationships with clients. Continuously stays up-to-date with the latest trends and technologies in the IT industry to deliver exceptional results.

WORK EXPERIENCE

data analyst/ developer 2021 - present

Decarbonify

I've been a back-end developer at decarbonify ensuring the website performs correctly, focusing on databases, back-end logic, application programming interface (APIs), architecture, and servers.

developer 2022 - 2-23

MMRS

I worked with MUCUTI Bruno Leandre on MMRS (Mine Monitoring Report System) as a developer.
MMRS it's a helpful system for minig companies for it helps them monitoring all mining related reports.
